  - 3.8 Carpentry & Aluminium
-

# Why? PFC Group

As a general engineering contractor, PFC has built a reputation for delivering innovative solutions in the construction of Commercial, Residential and Industrial applications.

To be row model company for premier construction, projects management and special engineering solutions provider by achieving extraordinary results for our customers, real careers growth for PFC people and earning real value of what we deliver.

# CIVIL CONSTRUCTION

01

## 1.1 SUB STRUCTURE & SUPER STRUCTURE

PFC provides customers with the most efficient and cost-effective value engineered solutions available to complete projects on time and under budget.

PFC advises customers on pre-construction choice based on an in-depth evaluation according to site circumstances.

# 1.2 Plastering

PFC is an experienced wall and Floor plastering Maintenance Company that operates with professionalism & High-Quality Service, Coving all small to large scale jobs such as Patchwork, Remodelling, New Construction, Perimeter Walls, Planters & Accent Walls, we have worked with a number of builders, companies from Construction.

The final finishing touches start with plastering and surface finishing, which ultimately results in a 100% satisfaction factor for the entire structure/building. PFC's plaster expertise provides maximum protection from the environment. The addition of a topcoat prevents the penetration of weather elements such as heat or rain and enhances texture. PFC pays attention to every detail to ensure quality is maintained. And that's why we have a huge list of satisfied customers.

## 1.3 Blockworks

Blockwork is valuable and solid, and builds quickly. When properly insulated, Blockwork is just as energy efficient as stamps. PFC uses a variety of well-established methods to construct walls and Plinthson all of our projects. Lift shafts, block and beam floors, and plant room walls are all examples of Blockwork PFC formation.

PFC installs different type of block work such as Hollow concrete blocks, Concrete Bricks, Solid concrete blocks, Lintel blocks, Paving Blocks and Aerated Autoclaved Concrete Block (AAC). PFC not only remodels residential structures, but also commercial ones. PFC provides renovation services for both indoor and outdoor spaces for a variety of projects.

# 1.4 Interlocks

PFC specializes in associate work with over ten years of experience. PFC ensures proper paver installation to provide our customers with a lifetime paving solution. The accuracy of the paving is very important, while other factors such as a suitable base made of limestone, granite or other stones suitable for the site and proper compaction are all that is required.

PFC offer all types of interlock services. PFC have a team of highly qualified staff with extensive experience in the field of interlocking. PFC aims to provide professional and systematised services to facilitate the performance of quality work with tight control over time procedures. PFC offers you the best service by using original materials and advanced tools, tight locking techniques.

# 1.5 Kerb Stones

PFC a specialist in broad variety of surface solutions and therefore offers a comprehensive range of road Curb, slabs, and edgings services. The paving service of PFC is widely used in commercial, industrial and residential areas. PFC offers different types of stone including edging, garden pavers, interlocking pavers to help you complete your project. PFC provides the best quality of work with our experienced team within a reasonable cost range.

From the installation of a new pavement with high-quality Curbstones and slabs to the addition of beautiful and practical edge slabs to a freshly resurfaced road or driveway, PFC will have the perfect solution. PFC undertakes pavement installation and restoration projects for a range of purposes and environments.

## 1.6 Screeding

PFC offers a wide selection of Screeding Systems to meet your project needs. Traditional Mortars, Fiber Screeds, Quick-Drying Mortars, Polymer Mortars, Liquid Mortars, Rubber Mortars, Lytag (Fly Ash) Mortars, Anti-Bacterial Mortars & Subfloors, Quick-Setting MMA Resin & Monolithic Mortars only are a few of the Services. Glazing materials provided by PFC, as well as Primers, Moisture Proof Films, Insulation & Sealants. Seamless Terrazzo, Parking Deck & Industrial Floor are the Main work areas.

# STEEL STRUCTURE, FABRICATIONS & ERECTION

# 02

## 2.1 HEAVY STEEL STRUCTURES

PFC undertake the responsibility of design, fabrication and installation of all steel structure works in commercial & residential type building like warehouse, Roof structure, canopies, façade support, cladding support & roof canopies. PFC offers Supply, Fabrication & Erection services under three broad classifications Design & Engineering, Construction Engineering. PFC have the facility to offer full design and construction of all types of structural steel works.

## 2.2 Insulated & Non-Insulated Cladding

PFC specializes in the installation of PIR and Rockwool Insulated Roof & Wall Panels, Corrugated Metal Sheets, Metal Decking Profiles, Purlins and Standing Seam Roofing for architectural façades and commercial and industrial roofing projects.

PFC specializes in the installation of PIR and Rockwool Insulated Roof & Wall Panels, Corrugated Metal Sheets, Metal Decking Profiles, Purlins and Standing Seam Roofing for architectural façades and commercial and industrial roofing projects. PFC has executed major projects in EMAL, DUBAL & Zahia City Center, Power Plants, Water Treatment Plants.

## 2.3 Fall Arrest System

PFC is specialized and has done many projects for both Life Line Installation and Life line Commissioning. PFC provides horizontal lifeline system which is designed to give safe access to any area of roof by allowing workers to be permanently attached to the line at all times. This includes 8mm 316 stainless steel wire, an inline shock absorber that minimizes loads applied to both the user and the building in event of a fall. The design has been configured and tested for use on variety of roof types like Standing Seam, Metal Profile.

## 2.4 Access Platforms

PFC has extensive experience in making staircase, walkaway and platforms for buildings and civil engineering structures. PFC designs and provides a safe means of access up and over obstructions present in a designated walkway as part of a safe roof access system or as a standalone item used internally (i.e., warehousing) when access is required.

To provide PFC with the most effective and affordable solutions for your project, PFC uses a wide selection of products from different manufactures. PFC aims to provide a cost effective solution for challenging Projects.

## 2.5 Rehabilitation of Industrial Structures

PFC is an offers affordable roof rehabilitation service. PFC provides solutions that are adhere directly to the clean bare substrate surface, whether it is a new deck or an existing roof system. PFC decreases adhesion Debris, grease, dust, or any other bond-breakers trapped between the deck's roofing surface and the freshly applied fluid substance will weaken or block adhesion.

PFC specialise in offering high strength epoxy primers variety of water proofing systems that creates a tight membrane, thereby preventing water leaking from roof and increase the durability of cladding.

# INTERIORS & FIT OUT

# 03

## 3.1 PAINTING

PFC provides a wide range of services across all aspects - Decorating, Industrial coatings, National painting, Infrastructural Painting and Commercial paintings.
